Re: Intern - Summer - Android Developer

Dear Product and Customer Experience Team,

I am writing to express my interest in pursuing an internship at Priceline.com LLC's Product and Customer Experience department. I am currently a high school senior and I am planning on majoring in Computer Engineering at a university next year. My main passion is computer science and computer engineering. When I learned about your summer internship, I thought I found the best place to gain more experience developing Android apps.

I believe that I am the best fit for the position at Priceline as an Android Developer Intern. I have experience creating Android apps, as I published 2 Android apps and 2 Android Wear apps on the Google Play Store, which you can find here, <https://play.google.com/store/apps/developer?id=Sagar+Garg>. I am also currently working on a few other apps that I hope to publish soon. I've been programming with Java for several years now and I have experience with Android Studios and Eclipse. Along with Android Development, I have experience with front end web development using HTML, CSS, and some JavaScript, and I also learning IOS app development currently.

I am hoping that we can discuss more about this internship opening at a meeting at a later time. You can contact me at my email, sagargarg@gmail.com, and learn more about me on my personal website that I created, <http://sagargarg.io/>. Thank you for taking your time out of your busy schedule for considering my application.

Sincerely,
Sagar Garg
